

Carbon Black Training Content

Introduction and concepts

Configure your evaluation environment.

Evaluate from the viewpoint of main users: Endpoint users and administrators.

Establish possible use cases and evaluation objectives, including:

- Phishing attack
- Infected bring-your-own-device (BYOD) equipment or machine
- Latent ransomware
- Targeted or insider threat

How to create a scorecard that allows to rate the functionality of the product in meeting operational requirements.

How to create appropriate evaluation documents and scripts based both on the scenario(s) and previous product evaluation results.
